

Akash Gohil

Product Designer & Design Systems Engineer

Mumbai, India • akashgohil.connect@gmail.com • +91 77386 32726 • [Portfolio](#) • [LinkedIn](#) • [Medium](#)

PROFILE

Product designer and design systems engineer with nearly 2 years of experience designing and shipping enterprise SaaS products across multiple platforms at Faclon Labs. Works across the full stack of product design, from interaction design and Figma systems to production React components, with a focus on reducing design-to-production time and helping engineering teams move faster.

EXPERIENCE

Product Designer • Faclon Labs

Jul 2025 – Present

- Built a design-to-code pipeline using Claude Code, Figma MCP, and a custom MCP server, adopted company-wide, cutting component delivery from 2-3 sprints to 1 day and eliminating handoff meetings entirely.
- Shipped Aura AI, a multi-agent voice assistant, from scratch in 2 days using Claude Code and MCP, with custom voice settings, model selection, reasoning prompts, and per-agent customization across multiple use cases.
- Built the Flask Design System in React + TypeScript with 60+ production components, Storybook stories, MDX docs, and ESLint rules, adopted company-wide across all modern Faclon products.
- Built a custom MCP server exposing the Flask Design System to all vibe-coded applications, letting developers pull production components and tokens directly into new products without manual handoff.
- Overhauled I/O Vision across 3 core modules (Camera View, Map View, Smart View), designing a 47-component Figma system with full dev handoff specs for industrial plant deployments across India.
- Standardized the Faclon Design System across 30-40 components, implementing consistent tokens, theming, and component variants to establish UI consistency across the product portfolio.

UI/UX Designer • Faclon Labs

Feb 2025 – Jun 2025

- Redesigned legacy platform features to meet current design standards, preserving brand identity and reducing visual inconsistencies across key user workflows.
- Identified gaps in the legacy design language and made the case to stakeholders, securing buy-in that led to the Faclon Labs Design System launching in Jul 2025.

Graphic Designer • Bounce Inc.

Jul 2024 – Aug 2024

- Produced marketing assets across banners, social creatives, and brand visuals for digital campaigns, maintaining visual consistency across all channels.

SKILLS & TOOLS

Product Design	Information architecture, interaction design, wireframing, prototyping, usability testing
Design Systems	Design tokens, component libraries, light/dark theming, accessibility (WCAG, ARIA), dev handoff
Frontend	React, TypeScript, Storybook, MDX, Git, GitHub, component architecture
AI & Tools	Claude Code, Cursor, Figma MCP, Vercel V0, MCP server development, Figma, Notion

EDUCATION

B.Tech, Information Technology • K.J. Somaiya Institute of Technology	CGPA 9.03 • 2022–2025
Diploma, Information Technology • Shri Bhagubhai Mafatlal Polytechnic	CGPA 8.9 • 2019–2022
